In a globalised and competitive economy, companies must continually improve their efficiency, productivity, quality and flexibility. Supply chain logistics management is crucial to achieving these objectives.

The Supply Chain Manager is a key player in the company, setting the objectives and strategy for supply and flow management projects. They design, organise and manage production-related operations, aiming for customer satisfaction and cost optimisation. The role is part of quality management and contributes to the company's sustainable development policy.

### LEARNING OUTCOMES

- Take responsibility for the global supply chain
- Organise and manage production and production sites
- Steer the quality and sustainable development policy
- Design, develop and upgrade performance measurement systems.
- Anticipate changes in the market and service demands
- Manage multicultural teams at European and global level
- Understand the sectoral challenges of the ecological transition and how organisations are addressing them
