The European Master's in Corporate Law, specialising in European and international business law, trains professionals to be immediately operational. In-house lawyers protect the interests of their organisation by managing contracts and disputes and ensuring that decisions are legal.

In an international context, they negotiate and draft in English. As part of the decision-making process, they assess the risks and propose advantageous legal arrangements. In an SME, they may coordinate external lawyers. In a large group, they often report to general management. Their tasks include analysing, negotiating and drafting contracts, managing litigation and advising on business law.

LEARNING OUTCOMES

- Independent legal monitoring
- Provide legal advice to the various departments of a company or organisation
- Master contract drafting techniques
- Master payment and credit instruments and guarantees in an international context
- Understand and draft international contracts
- Master international private business law
- Conduct legal negotiations and draft contractual documents in English
